

Landscape rake | Attachments

Main features

- Picks up rocks down to 19 mm and larger, and most 13 mm rocks
- Hydraulic cylinder opens top cover - for easier dumping, and also allows the bucket and cutting edge to be used to push and scrape debris
- Rake bars provide better leveling by providing longer ground contact
- Hardened teeth for longer wear
- Side skis, which are adjustable, provide depth control and leave only a slight "knife-edge" mark in the finished surface
