MK3 Powertex Facing Coat Sprayer

POWER-SPRAYS

MK3 POWERTEX FACING COAT SPRAYER

The MK3 Powertex Facing Coat Sprayer has been specifically designed for the rapid and economic application of a wide range of surface finishes and for spraying "mist" and facing coats used in GRC production.

Cement Paints	Stone Paints
Vermiculite and Perlite Mixes	Cementitious Mixes
Aggregate Loaded Resins	Emulsion Paints
Veneer and Plaster finishes	Non-slip deck coatings

The MK3 Powertex Facing Coat Sprayer is easy to operate. A range of finishes can be achieved by simply selecting the correct size of nozzle, adjusting the trigger displacement and regulating the air pressure.

Maintenance is also easy. Just undo one thumbscrew to dismantle the gun for cleaning.

Each MK3 Powertex Facing Coat Sprayer is supplied with a holding hopper, an elbow adaptor (for spraying floors and ceilings) and a spares pack with additional nozzle.

Specification:

Weight:	Approx 1.8kgs (4lb)
Hopper Capacity:	Approx. 4.5 litres (1 gallon)
Nozzle size:	4mm, 5mm or 7mm (special sizes made to order)
Air consumption:	200 litres/minute (7cfm) at 2.8bar (40psi)

Note: excessive hose lengths may require an increase in air supply.
